

*The SEDA-Windscreen Cutter.
A „must have“ in modern Recycling companies.*

The SEDA-Windscreen Cutter is the fastest and easiest solution to cut and remove Windshields from Cars.

With our special milling technology the User don't need a brake through point made from other machines. And with this special milling, it is very safety. The risk to cut into your hands from broken glass is up to zero.

A powerfull vaccum cleaning unit sucks the dust and other waste away into a special storage box.

You safe a lot of time and waste!
